### PHOTOGRAPHY

Our studio and team can accommodate any needs of traditional photography professionals and has a multitude of options available to those looking for a professionally lit photo studio for model or product photography. We can also advise on how to introduce new process improvements to incorporate XR technologies for a modernized workflow.

### FILM / MUSIC VIDEO / LIVE MUSIC PRODUCTION

Whether a feature film, indie project, or live performance, our team and partner network are standing by to bring your storyboard or show idea to fruition. Produced in the heart of Tokyo and a prime location to countless iconic areas, Hilton Tokyo is the newest hotspot for productions in Japan. Craft services can be managed and served by the world famous Hilton chefs and with it's in-house hair and makeup team, the crew can be handled professionally so you can focus on your creative process.

### VR CONTENT DEVELOPMENT AND EXPERIENCES

In addition to the various hardware and software tools listed here, our expansive network includes some of the world's greatest developers and studios to help make your next game or experience a reality.

If you are new to VR or just curious, book a time with our team to get hands-on experience in this growing industry and technology. We can show you the basic tools and processes by which VR is created and you can try it out yourself inside some of the most popular games and experiences.

Unreal Engine 5

Unity

TouchDesigner

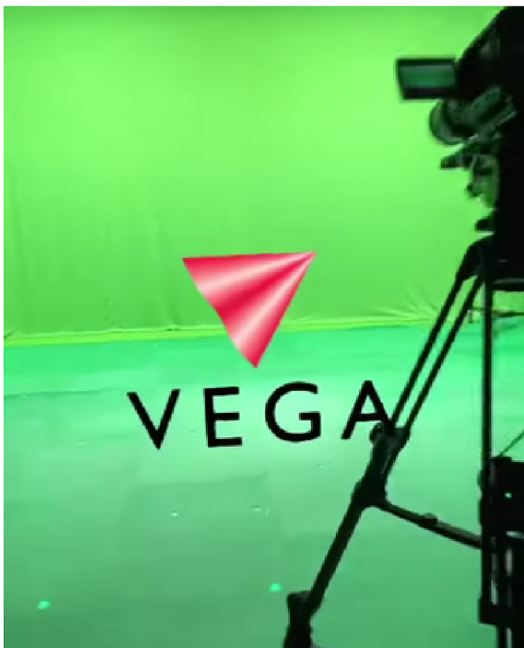

Blender

Meta Quest 2

HTC Vive Pro Eye

HTC Vive Focus 3

Antilatency Tracking System

### AR CONTENT DEVELOPMENT AND EXPERIENCES

Augmented Reality is the addition of information on top of the world that you see around you. Popular uses include 'face filters' or waypoint navigation but the options are truly limitless and our specialized team is here for you to explain the nuances and work together to achieve your vision.
