2024

V I R T U A L C A M E R A

A virtual camera refers to the movement of the digital camera while the physical camera remains still. This gives the illusion of having a larger set and opens up possibilities beyond reality.

*Static Sets can have up to 3 cameras

A tracked camera refers to both the physical and virtual camera moving simultaneously in the same way. This allows for more natural camera movements while having a set that can be both within and out of reality.

*Tracked sets only utilize 1 camera at this time
